## SUMMARY

Recently graduated Computer Science Engineer with strong foundations in Full Stack Web Development, Machine Learning, and hands-on experience with modern AI tools and frameworks. Passionate about leveraging AI and web technologies to build practical, real-world solutions and eager to contribute as a fresher in a dynamic and innovative tech environment.

## SKILLS

**Programming Languages:** C, Java, Python  
**Web Technologies:** HTML, CSS, JavaScript  
**Database & Backend:** MongoDB, Supabase, DB Browser for SQLite, Flask  
**Deployment & Tools:** Streamlit, Netlify, Render, Vercel

## EXPERIENCE

- Full Stack Web Development Intern (MERN)** Feb 2026 – May 2026  
*SuprMentr Technologies Pvt Ltd | in partnership with VTU, Belagavi*
- Completed a 15-week hands-on internship building full-stack applications using MongoDB, Express.js, React.js, and Node.js.
  - Developed **SecureBank**, a full-stack banking application with authentication, account management, and transaction history as the capstone project.
- Freelance Web Developer**  
*Independent | Real websites designed, built, and deployed for clients*
- Banashree Organics** | *HTML, CSS, JavaScript, Vercel* 🔗 Live Demo
- Designed and developed a full business website for a premium organic vermicompost brand in Karnataka, showcasing products, sustainable farming mission, and contact details to reach farmers and customers online.
- Pattalli Areca Mill** | *React, Tailwind CSS, Vercel* 🔗 Live Demo
- Built a professional website for a modern areca nut processing mill covering services – peeling, cutting, drying, and grading – with a clean layout for farmer and business audiences.

## ACADEMIC PROJECTS

- SecureBank: Full-Stack Banking Application** | *Flask, PostgreSQL, HTML/CSS/JS* 🔗 Live Demo
- Built a secure banking platform featuring JWT-based auth, MPIN/OTP multi-factor authentication, QR code transfers, voice banking, and geographic login history tracking.
  - Implemented RESTful APIs with Flask and PostgreSQL; deployed on Vercel with gunicorn as the WSGI server.
- MedVerify – AI-Powered Medicine Verification App** | *Flutter, Dart, SQLite, Groq AI* 📱 Download APK
- Developed an offline-first Flutter app that scans medicine barcodes via camera or manual input and verifies authenticity against a bundled SQLite medicine database with AI-assisted fallback through Groq AI.
  - Features local scan history, confidence scoring (GENUINE / SUSPICIOUS / FAKE), alternative suggestions, and guest/registered user sessions – all without requiring internet connectivity.
- Multiple Disease Prediction System** | *Python, Streamlit, Machine Learning* 🔗 Live Demo
- Built a Streamlit web application predicting 7 diseases – Diabetes, Heart Disease, Parkinson's, Liver, Hepatitis, and Lung Cancer – using ML models (SVM, Random Forest, XGBoost, Gradient Boosting) trained on clinical datasets from UCI ML Repository and Kaggle.
  - Implemented a symptom-based general disease prediction module using XGBoost across 132 symptoms with ~95% accuracy, alongside parameter-based disease-specific models achieving up to 90% accuracy.

## CERTIFICATES

- Certificate of Internship – Full Stack Web Development (MERN) — *SuprMentr Technologies & VTU, Belagavi*
- Applied Artificial Intelligence: Practical Implementations — *TechSaksham (Microsoft & SAP)*
- 5-Day AI Agents Intensive Course with Google — *Kaggle & Google*

## EDUCATION

|                                                         |                    |
|---------------------------------------------------------|--------------------|
| <b>T John Institute of Technology, Bangalore</b>        | 2022 – 2026        |
| <i>B.E. in Computer Science and Engineering</i>         | CGPA: 8.17         |
| <b>Amar Jyothi Composite PU College, Sorab, Shimoga</b> | 2022               |
| <i>Pre-University – PCMB (12th)</i>                     | Percentage: 71.66% |
